GUJI SHAKISO

Ethiopia

Notes

Berry, raisin, molasses

Our first Ethiopian of 2026, if you enjoy coffees from this region of the world, this delivers on taste; juicy, sweet and balanced.

This coffee orginates from the Shakiso district, in the Guji region; one of the most infamous areas for coffee production in Southern Ethiopia. Following a rigorous selective handpicking process, the cherries are promptly pulped. After careful fermentation, the parchment is washed in clean water and transferred to raised beds to sun-dry. The coffee is raked frequently to ensure uniform drying, reaching optimal moisture content within 7-12 days.
